

# OUR OPERATIONAL EMISSIONS

## Total annual emissions (tonnes CO<sub>2</sub>e)

Emissions are reported in accordance with the GHG Protocol. 2019/20 and 2022/23 data has been verified to ISO 14064-3 standard by Carbon Intelligence Energy Services Ltd and Lucideon CICS Ltd respectively.

The AELTC purchases zero carbon renewable electricity for c95% of its use, however this graphic shows the emissions of this electricity as supplied to the UK grid. This is described in the AELTC consolidated financial statements as the 'location' (ie UK grid average) rate. Consumption not covered by our renewable purchase, is separately illustrated as non-renewable. In the financial statements this proportion of our electricity is listed at 'market' (ie renewable purchase) rate.

2022/23 gas and electricity include consumption for the Community Sports Ground at Roehampton
